DD Resources Funding Administration

DD Resources administers public funds and by virtue of its funding sources is a public agency, and therefore is subject to constitutional limits as well as other regulatory elements. Moreover, it has certain oversight responsibilities for the actions of service providers that receive funds from DD Resources.

DD Resources must take the position of neutrality toward any all political and/or religious practices, events, celebrations, and activities.

It is DD Resources' goal that individuals with developmental disabilities living in the City of St. Louis receive inclusive services. Therefore, agencies receiving funding from DD Resources must also act with neutrality to ensure that service delivery is free of any political and/or religious component.
